

Thinking and Reasoning with Data and Chance, 68th Yearbook: 2006 (illustrated edition)

Filesize: 2.74 MB

Reviews

It is one of the most popular ebooks. Better than ever, though I am quite late in starting to read this one. You will not feel monotony at any moment of your own time (that's what catalogs are for about when you request me).

(Alphonso Flatley IV)

THINKING AND REASONING WITH DATA AND CHANCE, 68TH YEARBOOK: 2006 (ILLUSTRATED EDITION)

National Council of Teachers of Mathematics, U.S. Hardback. Book Condition: new. BRAND NEW, Thinking and Reasoning with Data and Chance, 68th Yearbook: 2006 (illustrated edition), Gail F. Burrill, Portia C. Elliott, The 2006 NCTM Sixty-eighth Yearbook focuses on students' and teachers' learning in statistics centered on a set of activities. Topics include the relation between mathematics and statistics, the development and enrichment of mathematical concepts through the use of statistics, and a discussion of the research related to teaching and learning statistics. The yearbook articles cover a variety of broad areas, including sections on Learning about Data and Chance, Reasoning with Data and Chance, and Reflecting on Issues Related to Data and Chance. Articles focus on such topics as examining children's beliefs about "what is fair" and using simulation techniques in the classroom. The accompanying CD offers support material for many of the articles, including lessons, software demonstrations, and even video clips of classrooms. NCTM yearbooks focus concerted attention on timely issues by viewing them in depth, from multiple perspectives, through interdisciplinary lenses, and across different grade bands. The year 2006 marks the sixty-eighth yearbook in the NCTM yearbook series.
