Why is Milk White?: 200 Other Curious Chemistry Questions (Paperback)

By Alexa Coelho, Simon Quellen Field

Chicago Review Press, United States, 2013. Paperback. Book Condition: New. 226 x 152 mm. Language: English . Brand New Book. Covering a wide variety of everyday chemistry concepts from the very simple to the more complex, this question-and-answer primer provides straightforward, easy-to-understand explanations for inquisitive young scientists questions. A dozen unique experiments to try at home from lifting latent fingerprints from a crime scene using super glue (for smooth surfaces) or iodine (for paper) to hollowing out the zinc interior of a penny using muriatic acid are interspersed with the answers to such questions as What makes soda so fizzy? and Why do you get cavities when you eat too much sugar? From separating food coloring into its component dyes to using easy-to-find chemicals to create slime, Silly Putty, or bouncing balls, this handy guide is the ideal resource for the budding chemist.

Reviews

I actually started looking over this publication. It really is rally interesting throgh studying period. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Dana Hintz

Good electronic book and valuable one. It really is basic but unexpected situations in the 50 percent in the pdf. You wont really feel monotony at at any moment of your time (that's what catalogues are for concerning when you ask me).
