

The theory of strains in girders and similar stuctures with observations on the application of theory to practice and tables of the strength and other properties of materials Volume 1

By Bindon Blood Stoney

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1869 Excerpt: . . . thrust of the lower flange against the abutment is equal and opposite to the pull of the upper flange, so that they form a couple whose tendency is to overturn the abutment on its lower edge next the weight. 149. Strains In braced webs may be deduced from shearingstrain. -- When the flanges are parallel and the bracing consists of a single system of triangulation, the strain in any brace is equal to the shearing-strain multiplied by $\sec \theta$. Hence the strains in the bracing might be deduced from the shearing-strain in the web calculated in the manner explained in Chap. II. (14, 18). The method of the resolution of forces just described is, however, better calculated to give a correct perception of the properties of diagonal bracing, and it has moreover the advantage of being applicable to lattice girders as well as those whose bracing consists of...
